Jason Pittman

Cloud Architecture | Full Stack IT Leadership | AI & Automation | Technical Program Management

📞 **213-590-2801** | 📧 **jasonpit@mac.com** | 🌐 LinkedIn

Executive Summary

Dynamic **Full Stack IT, Cloud, and Infrastructure Leader** with over 15 years of experience architecting, administering, securing, and optimizing complex global enterprise environments.
Expert in **cloud strategy, cybersecurity, full-stack infrastructure design, identity platforms, technical program leadership**, and **M&A integrations**.
Currently leading **global cloud operations and strategic initiatives** across seven Azure tenants and hundreds of subscriptions at Warner Bros. Discovery, partnering directly with executive leadership to drive operational excellence, innovation, and cross-functional collaboration.

Proven success delivering **$1M+ annual cloud savings** through infrastructure optimization, governance, and modernization programs.
Trusted **consultant, advisor, and solutions engineer** with deep expertise in **cloud computing, hybrid cloud architecture, local virtualization**, and **large-scale desktop and end-user computing provisioning, management, and design**.
Passionate **AI advocate and automation pioneer**, accelerating enterprise adoption of AI-native solutions across cloud management, security, and operational workflows.

Advanced **Linux engineer** specializing in **virtualization, containerization**, real-time systems, and **professional-grade audio engineering and sound design** across all platforms.

Professional Experience

Warner Bros. Discovery, Los Angeles, CA

Senior Cloud Engineer / Acting Solutions Engineering Manager
Apr 2021 – Present

- Managed a high-performing team of cloud engineers and architects, leading solutions engineering initiatives, major migration projects, and strategic infrastructure programs during organizational restructuring.
- Transitioned to focus on global Azure cloud operations post-realignment, driving operational excellence, subscription governance, automation initiatives, and security enhancements across seven tenants and hundreds of subscriptions.
- Partner with Microsoft TAMs, WARA, and CSAM teams to guide support escalations through Services Hub, deliver compliance improvements, and optimize tenant performance and security posture.
- Spearheaded an Azure subscription resource validation initiative, achieving **$1M+ in annual cloud cost savings** through proactive cleanup, policy enforcement, and automation.
- Engineered and deployed automation scripts to locate, validate, and install security agents across hundreds of unmanaged Azure VMs globally, resolving critical CSO-priority vulnerabilities.

- Advocated for and championed **early adoption of AI-native solutions** across cloud management workflows, enhancing operational efficiency, resilience, and strategic innovation.
- Supported M&A, divestiture, and cloud migration programs involving Microsoft 365, SharePoint Online, Power Platform, and hybrid cloud ecosystems, maintaining zero production downtime during critical transitions.
- Led complex SharePoint and Power Platform global migrations with **zero production downtime**, ensuring seamless transitions for critical business units.
- Oversaw the development of an M365 Outlook-based threat reporting solution, enabling rapid incident response in collaboration with WBD Security, FBI, and Homeland Security.
- Managed hybrid cloud ecosystems across AWS, Azure, Active Directory, and Office 365.
- Served as an essential engineering team member in Warner Bros. Discovery's rebranding and multi-cloud migration initiatives, collaborating directly with Microsoft engineers to drive successful infrastructure transitions.
- Led a company-wide MDM migration from VMware Workspace One to Microsoft Intune.
- Architected disaster recovery frameworks meeting CSO, legal, and compliance standards.

Fullscreen Media (Otter Media, Crunchyroll, Rooster Teeth) *(part of Otter Media, acquired by WarnerMedia/AT&T)*

Senior Systems Engineer / Manager
Apr 2019 – Apr 2021

- Led help desk and systems engineering teams across California and New York City locations, driving operational excellence and support innovation.
- Architected and rebuilt Fullscreen's IT infrastructure across both coasts, enhancing performance, reliability, and security.
- Engineered VMware-based local data centers (LDCs), significantly reducing AWS dependency and optimizing cloud expenditure.
- Architected and deployed a scalable AWS-based live streaming platform enabling Fullscreen's teams to deliver 20+ simultaneous Netflix-quality 1080p YouTube streams globally for brands like Mattel, replacing unreliable local systems and supporting $10K+ per-stream revenue opportunities, while preserving full OBS control per stream.
- Built Trusted Partner Network (TPN)-compliant secure video editing environments and developed new MDM workflows for a 600+ device macOS fleet, improving deployment speed and security.

Hermes BorderGuru, Greater Los Angeles Area

Consultant, Cloud and IT Infrastructure
Jan 2017 – 2021

- Led cloud and IT full-stack infrastructure across U.S. and Mexico.
- Designed Amazon Connect call centers for e-commerce brands.
- Implemented ISO27001 compliance frameworks enterprise-wide.

.XYZ (Top-Level Domain Registry)

Systems Administrator II / Junior DevOps Engineer
Jul 2016 – Apr 2019

- Managed AWS, Azure, and Linux server operations supporting domain sales and fintech services.
- Built ElasticSearch clusters on-premises, saving significant AWS spend.
- Architected and deployed one of the first Amazon Connect-based call center platforms globally, replacing legacy 8x8 systems at 1/16th the cost. Integrated intelligent database-driven routing to prioritize high-value customers across domain sales and fintech services, dramatically boosting sales conversion rates while reducing staffing needs to a single agent.
- Deployed ARM64 Bitcoin mining operations at industrial scale.

Fox Television Animation (Family Guy, American Dad & The Clevelnad Show)

Senior Systems Administrator / Manager
Jun 2008 – Jul 2016

- Led a team of four systems administrators, overseeing support operations and infrastructure enhancements across production environments.
- Directed IT infrastructure strategy for Fox Animation and Fox Television IT.
- Architected desktop infrastructure and macOS deployment automation for a 350+ device Mac fleet, enhancing efficiency, consistency, and scalability across production environments.
- Engineered Linux-based virtualized render farms reducing render time by 95%.
- Engineered a cost-effective backup and storage solution in collaboration with Carbon Copy Cloner, automating local and offsite backups to an Amazon datacenter. Replaced a proposed $9K+ enterprise backup system with a customized solution for a few hundred dollars, overcoming complex file structure challenges unique to Fox Animation.
- Supported network hardware ecosystems (Cisco, Palo Alto).

Earlier Career Highlights

B&C Design | Beuniki Jewelry – Partner, Operations & Cloud Infrastructure (2012–2021)

- Co-founded and scaled an online jewelry business to $1.5M/year in sales, managing full-stack cloud infrastructure, e-commerce platforms (Shopify, WordPress), and global marketing operations.
- Directed a global team of influencers and executed high-impact digital marketing campaigns across Instagram, Twitter, and Facebook.

Voyager Productions (Cosmos: A Spacetime Odyssey) – Consultant, IT Infrastructure (2012)

- Designed IT infrastructure solutions for production of "Cosmos: A Spacetime Odyssey," supporting high-performance video editing and rendering environments.

Apple, Inc. – Mac Genius (2004–2007)

- Delivered certified hardware and software support for Mac systems at Apple retail, specializing in customer-facing technical troubleshooting and repair services.

Musicians Institute (Recording Institute of Technology) – Instructor, MIDI Sampling and Electronic Music Production (2002–2004)

- Designed and taught an advanced curriculum in electronic music production, sampling, and synthesis for Level 2 audio engineering students, blending technical systems knowledge with creative

production techniques.

Technical Skills

Cloud Platforms & Architecture

- **Platforms:** Azure, AWS, Google Cloud, DigitalOcean
- **Architecture:** Hybrid Cloud Strategies, Infrastructure Design, Solutions Engineering

Security & Compliance

- **Frameworks:** ISO27001, PCI Compliance, Zero Trust Architecture
- **Practices:** Cloud Governance, Disaster Recovery Planning

Identity, Access & Authentication

- Microsoft Entra ID, Azure Active Directory (Azure AD), Active Directory Federation Services (ADFS)

Virtualization & Containerization

- VMware, Proxmox, Docker, Kubernetes, KVM, LXC

Linux Systems & Server Administration

- Debian, RHEL, Arch Linux (Server/Desktop/Audio Engineering), Windows Server (all versions)

Automation, Scripting & DevOps

- Bash, PowerShell, Terraform, GitHub Actions, Jenkins, Bitbucket, Azure DevOps
- HTML, PHP, Python (fundamentals)

Device Management & End-User Computing

- JAMF, Intune, Workspace One, Apple Business Manager, MUNKI, Puppet
- macOS, Windows, Linux, iOS, iPadOS, Android (Zero-Touch Deployments)

Collaboration Tools Administration

- Microsoft 365, Slack, Zoom, Microsoft Teams

AI & Automation

- OpenAI APIs, Microsoft Power Platform, GitHub Copilot
- AI-driven Workflow Automation and Process Enhancement

Audio Engineering & Sound Design

- Pro Tools, Logic Pro, Digital Performer, Nuendo/Cubase, Ableton Live, Melodyne
- Linux-based Low-Latency Systems, Live and Studio Sound Engineering
- Sound Synthesis and Sampling Systems (Hardware and Software)

Leadership & Project Management

- Solutions Architecture and Technical Program Leadership
- Agile Methodologies (Scrum, Kanban)
- Global Cloud Migration and Optimization Programs
- Vendor Relationship Management (Microsoft, AWS Solutions Teams, Carbon Copy Cloner)
- Mentorship and Team Building (Training Junior Engineers, Cross-Functional Coaching)
- Collaboration with Security and Compliance Teams (CSO, Homeland Security, FBI)

Education

Musicians Institute, Los Angeles, CA
1999 – 2001

- **Honors Graduate**
- Focus: **Audio Engineering, Acoustics, Sound Design, and Music Production**
- Built foundations of complex systems thinking critical to IT architecture and real-time system performance engineering.
- After graduation, I spent 2.5 years teaching the MIDI Sampling class at MI's Recording Institute of Technology (RIT), a Level 2 advanced course for audio engineering students focused on advanced sampling, synthesis, sound design, and music production techniques. I Designed the curriculum based on the concept of musique concrète, blending the history and evolution of hardware and software tools into practical, hands-on learning.

Professional Development

- Microsoft ESI: Azure AZ104, SC300, AZ1001, AZ2003, Dynamics CRM & ERP Fundamentals *(Completed April 2024)*
- Apple Certified Macintosh Technician (ACMT), Apple Certified Portable Technician (ACPT)
- PowerShell: Automating Administration *(LinkedIn Learning, 2021)*
- Ongoing leadership, cloud computing, Linux engineering, web and application development, and AI/ML specialization

---

Personal Interests

- Integrating AI innovation across enterprise IT and infrastructure workflows
- Developing Linux-based pro audio systems and sound design environments
- Passionate about mentoring and driven by a relentless commitment to learning and innovation

---
